To Whom It May Concern:

I am writing this letter as a testimonial to the excellent tutoring and guidance we have received from the Academy for Mathematics and Science

I have two daughters who have both always found math to be somewhat of a challenge, and as a result we have sought the assistance of professional tutors on several occasions. It was our good fortune to find Bruce Rippon's Academy for this past semester, and I only wish we had known of its operation before.

Bruce has a thorough understanding of the school curriculum as well as the expectations of students and the timing of their tests and exams. The Academy has a number of wonderful tutors and our feedback regarding the comfort and compatibility of the tutors was always welcomed and encouraged. My daughter received clear and understandable explanations for her questions. The tutoring she received helped her not only to better her marks, but alleviated a great deal of her stress, and gave her more confidence in approaching mathematics.

We do not live near to the Academy and so I regularly say in the waiting room while my daughter received instruction. As a result I had opportunity to observe many students. While there were differences in ages, abilities, and levels of enthusiasm for tutoring, there always seemed to be a real rapport between Bruce and the students, both younger and older. This is a place that is welcoming, understanding, and truly has the best interest of its students at heart.

I would highly recommend Bruce's Academy for Mathematics and Science to any parent.

Sincerely,

Anne W
